

Gammill Classic Plus Quilting Machine

\$7,500 (Reasonable offers considered)

I am a professional longarm quilter upgrading to a different machine. I am the original and only owner of this amazing machine which has had regular Gammill authorized maintenance. Specs include:

- 12 foot steel constructed table
- Regulated and standard stitch modes
- Set of canvas zippered leaders
- Set of Red Snappers for 12 ft table
- Laser light for pantographs
- Stand alone bobbin winder
- Swivel casters on legs
- Overhead light bar
- Gammill workstation with templates
- Two station needle positions
- Ruler base
- Soft touch handles - front and back
- Micro tech handles
- Batting bar below
- Side clamps
- Misc items - tools, parts, thread, etc.

In addition this machine can be upgraded to the Statler Stitcher automated quilting program.

If you are new to quilting - I would be happy to show you how to load a quilt with snappers and give you an overview of the machine and general maintenance before we take it apart. I can guide and assist you with instructions in taking the machine and table apart. I DO strongly suggest you contact Gammill and register yourself on their website as an owner so you can have access to their vast video library and free technical support - 7 days a week. You might also wish to hire them to come and set up your machine at it's new location. Buyer is responsible for transportation, re-assembly and all associated costs.

All sales are final. Payment accepted by Certified Bank check which must then be certified and approved by my bank in order to complete this transaction.
